A degree in **INFORMATION ASSURANCE AND CYBERSECURITY MANAGEMENT** from the **UNIVERSITY OF SOUTH FLORIDA**

UNIVERSITY of **SOUTH FLORIDA**
Muma College of Business

TRAITS OF USF INFORMATION ASSURANCE AND CYBERSECURITY MANAGEMENT STUDENTS

DETAIL-ORIENTED

A field focused on technology, unsurprisingly, requires someone who pays attention. Information and cybersecurity management professionals are always on the lookout for ways to move forward, but also avoid setbacks.

PROBLEM-SOLVING

Within those details are the problems and solutions. Professionals managing these high-stakes technologies (protecting customers' personal information, company finances and more) will be expected to find new ways to better the technology and processes they use.

ORGANIZED

Graduates of this degree program will develop the skills they need to manage cybersecurity professionals. To keep their team on track of their goals, students in this major will need to practice being organized now to be prepared for their responsibilities later.
